

## CU RETRACTILE

The CU retractile is a type of bag with a high barrier to oxygen and humidity; **high resistance and retraction.**

These bags enable us to **vacuum pack and retract** without losing the transparency and resistance, achieving a packed product and without plastic edges that give your product a visual impact and a high degree of conservation.

It is suitable for packing cured ham, salt pork, bacon, cured pork loin, **processed meat, fresh meat**, frozen and smoked fish or cheeses.

---

### OPCIONES

- Printed in flexography and 6 colours (we have our own Design Department).
- Two-sided printing.

---

### MICRONAGE

Several options.
